Acknowledge

As we understand that the eProject is a step-by- step learning environment that closely simulates the class-room and Lab based learning environment into actual implementation. It is a project implementation at your fingertips!! An electronic, live juncture on the machine that allows you to.

- ✓ Practice step by step i.e. ladder approach.
- ✓ Build a larger more robust application.
- ✓ Usage of certain utilities in applications designed by user.
- ✓ Single program to unified code leading to a complete application.
- ✓ Learn implementation of concepts in a phased manner.
- ✓ Enhance skills and add value.
- ✓ Work on real life projects.
- ✓ Give a real life scenario and help to create applications more complicated and useful.
- ✓ Mentoring through email support.

We would like to send a great thank to our professor and others student for the addorable supports during the time in project.

Beside serveral mistakes we had made in the project, we hope to have more oppotunities to widen our knowledge in web developing world.

We also thank you so much for your infomation and the “demo” project from India APTECH to help us get more reality experience in this project. Since we have gained more experience from this project, we will not stop learning any thing as much as we can to be more successful in the future.

Your Sincerely,

Team Group 5

Synopsis

The Objective of this program we aim is to give a sample project to work on real life projects. These applications help us build a larger more robust application.

The objective is not to teach us HTML/JavaScript but to provide us with a real life scenario and help us create basic applications using the tools.

Hence, we can revise the chapters before we start with the project.

This project is meant for students like us who have completed the module of HTML5. These programs should be done in the Lab sessions with assistance of the faculty if required.

The website (in this project) is a tool that brings everything in the world to you such as historic monuments information natural knowledge or skill in technology...

It is very essential for us that will have a clear understanding of the subject. We think we should go through the project and solve the assignments as per requirements given.

And get back ***eprojects@aptech.ac.in*** as the assigned schedule.

Design Plan: Bid Spirit	Document Name: Problem Definition	SWD/Form No.01/PD/Ver1.0
Effective Date: 14-07-2022	Version 1.0	Page No: 1 of 14

Problem Definition

To acquire an antique such as a 14th century painting or bronze sculptures 20 years ago, antique aficionados or collectors had to compete by giving a greater purchasing price, and whoever offered the highest final price won the priceless antique. However, as information technology advances, client demands are changing. Customers are also rising in number: they want to know the specifics of antiques, such as their origin and list price. Furthermore, owing to the influence of COVID-19, clients will find it difficult to proceed straight to the auctions.

As a result, the BidSpirit project - an online auction platform for antiques- intends to assist clients in getting an overview of antiques, evaluating items, and participating in auctions.

Identify the problem

Bid Spirit webmaster:

- ✓Carry customised online auctions
- ✓Provide real-time pricing for antiques
- ✓Ensure to facilitate wider participation of bidders
- ✓Receive the comments of customers and members to improve the quality
- ✓Recieve the customers feedback of products and the company

✓Provide the webmaster with editing the products and auctions information

✓Provide the webmaster with administrator privileges

Customer:

- Search the basic information of the antiques: origins, price
- Register as membership of Bid Spirit
- Participate in bidding the products in online auctions
- Send feed back to the antiques and Bid Spirit

Customer Requirements Specifications

User:

input:

- Entering member registration/login information
- Posting information items and search for product information

Process:

- Checking product information
- Checking registered member information

Output:

- Notifying successful/failed registration
- Notifying of successful/fail login
- Showing selected and related products
- Notifying the product bid price
- Notifying successful/failed auction

Webmaster:

input:

- Administrative login information
- Information about products and auctions that need to be added/edited/deleted
- Member information that needs to be added/edited/deleted
- Product and auction information
- Respond to customer comments

Process:

- Adding/editting/deleting products
- Adding/editting/deleting members
- Checking feedback information
- Checking the auctions

Output:

- Notifying the login
- Notifying the product information successfully/ unsuccessfully
- Notifying member successfully/ unsuccessfully
- Notifying the paid price for items
- Showing list of auctions
